

Course ID: A1004_09

Course Title: Bloodborne Pathogens and Infection Control 2009

Course Time Estimate: 90 minutes

This program has been approved for 1.5 hours Continuing Respiratory Care Education (CRCE) credit by the American Association for Respiratory Care.

Course Description: This course discusses OSHA's Bloodborne Pathogen Standard (29 CFR 1910.1030) and details for those healthcare workers at risk for acquiring bloodborne pathogens during the performance of work duties what precautions must be taken to reduce these risks. This course will also discuss the legal requirements businesses must perform in order to comply with OSHA's BPP standard.

Course Objectives:

- Be able to select the definition and types of Bloodborne Pathogens.
- Be able to select who is responsible for an Exposure Control Plan.
- Be able to select the definition of Universal Precautions and when they should be used.
- Be able to select examples of workplace controls used to prevent or decrease Bloodborne Pathogen exposure.
- Be able to select the requirements and procedures for hand washing.
- Be able to select the correct actions to take if occupationally exposed to Bloodborne Pathogens.
- Be able to select the correct signs, labels and color coding for regulated waste.
- Be able to select personal protective equipment and proper procedures for using them.
- Be able to select the requirements and your rights for hepatitis B vaccinations.
- Be able to select the difference between decontamination and sterilization.

Course ID: 1005

Course Title: Death and Dying

Course Time Estimate: 60 minutes

This program has been approved for 1.0 hours Continuing Respiratory Care Education (CRCE) credit by the American Association for Respiratory Care.

Course Description: This course discusses the grieving process experienced by patients, caregivers, and employees as they deal with death and dying. The five stages of the grieving process as defined by Dr. Elisabeth Kubler-Ross will also be covered in this course. By dealing with grieving individuals in a caring and understanding manner, the services and care provided can aid patients in moving through the stages of grief and will allow them to live out the rest of their lives with dignity and respect.

Course Objectives:

Be able to select the physician that pioneered research on death and dying.

Be able to select the definition of grief

Be able to select ways dying patients experience and present grief.

Be able to select the five stages of grieving.

Be able to select key information about the five stages of grieving.

Be able to select the two groups of people that suffer the grief of terminal illness.

Be able to select reasons why understanding the stages of grieving is important to home care providers.

Be able to select how to treat and interact with a co-worker that may have a terminal diagnosis.

Be able to select how to communicate with bereaving individuals.

Course ID: D1020_09

Course Title: Tuberculosis and Homecare 2009

Course Time Estimate: 50 minutes

This program has been approved for 1.0 hours Continuing Respiratory Care Education (CRCE) credit by the American Association for Respiratory Care.

Course Description: This course discusses tuberculosis and its diagnosis, treatment, and prevention. Special attention is paid to healthcare workers and how they may protect themselves by following an infection control program, which includes the use of respirators.

Course Objectives:

- Be able to select the bacterium that causes tuberculosis.
- Be able to select ways to diagnose tuberculosis.
- Be able to select TB skin testing procedures.
- Be able to select characteristics of latent tuberculosis.
- Be able to select characteristics of active tuberculosis.
- Be able to select treatments for tuberculosis.
- Be able to select uses of the tuberculosis vaccine.
- Be able to select ways to prevent the spread of tuberculosis.
- Be able to select characteristics of an infection control program.
- Be able to select OSHA's respiratory requirements for protection from the tuberculosis bacteria.

Course ID: D1060

Course Title: Child Abuse and Neglect

Course Time Estimate: 70 minutes

This program has been approved for 1.4 hours Continuing Respiratory Care Education (CRCE) credit by the American Association for Respiratory Care.

Course Description: This course discusses the federal definitions of and types of child abuse and neglect. This course also discusses signs and symptoms that may indicate child abuse and/or neglect and ways to help prevent such abuse and/or neglect.

Course Objectives:

- Be able to select the importance of concerted efforts in preventing child maltreatment.
- Be able to select the legal definitions for types of child maltreatment.
- Be able to select the federal Act that defines child maltreatment.
- Be able to select the signs and symptoms that may indicate the presence of child maltreatment.
- Be able to select how the child protective services system operates.
- Be able to select the definition and requirements of mandatory reporters.
- Be able to select how to report child maltreatment.
- Be able to select the demographics of those that are committing child maltreatment.
- Be able to select the long-term, physical, behavioral, and societal consequences of child maltreatment.

Course ID: D1070

Course Title: Elder Abuse and Neglect

Course Time Estimate: 60 minutes

This program has been approved for 1.2 hours Continuing Respiratory Care Education (CRCE) credit by the American Association for Respiratory Care

Course Description: This course discusses the federal definitions of and types of elder abuse and neglect. This course also discusses signs and symptoms that may indicate elder abuse and/or neglect and ways to help prevent such abuse and/or neglect.

Course Objectives:

- Be able to select the perpetrators of elder maltreatment.
- Be able to select the incidence of elder maltreatment.
- Be able to select the legal definitions for elder maltreatment terminology.
- Be able to select the 10 concepts on aging.
- Be able to select risk factors for elder abuse.
- Be able to select actions to be taken when elder abuse is suspected.
- Be able to select adult protective service functions and their role in investigating abuse reports.
- Be able to select ethical principles and best practice guidelines.
- Be able to select tips for caregivers to evaluate their own potential for elder maltreatment.
- Be able to select how to report elder abuse, neglect, and exploitation.

Course ID: P1490

Course Title: Equipment Cleaning & Disinfection

Course Time Estimate: 60 minutes

This program has been approved for 1.2 hours Continuing Respiratory Care Education (CRCE) credit by the American Association for Respiratory Care.

Course Description: This course provides clinical staff and service technicians with the information necessary to safely clean equipment and protect themselves and others against potential infectious materials, and includes Centers for Disease Control disinfection definitions, Spaulding medical equipment classifications, types and uses of disinfection agents on classification of equipment cleaning, infection control guidelines, facilities layout, personal protective equipment, and equipment cleaning procedures.

Course Objectives:

Be able to select the federal agencies that regulate employee safety and equipment cleaning procedures.

Be able to select the definitions for equipment cleaning, disinfection and sterilization.

Be able to select the different Spaulding equipment cleaning classifications and examples that fall into each classification.

Be able to select examples of disinfection agents and their use with the Spaulding medical equipment categories.

Be able to select features of a properly planned equipment cleaning and processing area.

Be able to select procedures for cleaning non-critical medical equipment.

Be able to select specifications and uses for personal protective equipment.

Be able to select alternate cleaning methods.

Be able to select the procedures for disinfecting equipment cleaning work areas.

Be able to select the purpose of and locations for Material Safety Data Sheets.

Be able to select the definition for the abbreviation MSDS.

Course ID: P3300

Course Title: CGMP Guidance

Course Time Estimate: 100 minutes

This program has been approved for 2.0 hours Continuing Respiratory Care Education (CRCE) credit by the American Association for Respiratory Care.

Course Description: This course details the requirements for operating a transfilling program and complying with the FDA's requirements for Current Good Manufacturing Practice.

Course Objectives:

Be able to select the federal agency requiring compliance with CGMP.

Be able to select the designated sections in the CFR that apply to CGMP.

Be able to select employer requirements for CGMP.

Be able to select employee requirements for covered entities.

Course ID: V2500

Course Title: Clinician's Guide to Ambulation Products

Course Time Estimate: 50 minutes

This program has been approved for 1.0 hour Continuing Respiratory Care Education (CRCE) credit by the American Association for Respiratory Care

Course Description: This course provides the clinician with the necessary information to teach and assess the use of ambulation aids so they can improve the level of care provided.

Course Objectives:

Be able to select the purpose of ambulation products.

Be able to select different types of ambulation products.

Be able to select the proper patient instruction techniques for ambulation products.

Be able to select if a patient is using an ambulation aid correctly.

Be able to select actions to take when a patient is witnessed misusing an ambulation aid.

Course ID: V2700

Course Title: Home Infant Apnea Monitors

Course Time Estimate: 75 minutes

This program has been approved for 1.5 hours Continuing Respiratory Care Education (CRCE) credit by the American Association for Respiratory Care.

Course Description: This course addresses sleep apnea in infants and the apnea monitors that are used to monitor them. It will cover different types of apnea monitors and will provide instructions for delivery, pickup and exchange, educating caregivers, functional checking and routine maintenance. This course also provides education on medical terms, their definitions, and how they apply to apnea.

Course Objectives:

Be able to select definitions for the different types of apnea.

Be able to select medical terms and their meanings that apply to apnea.

Be able to select the purpose of apnea monitors.

Be able to select the different types of apnea monitors.

Be able to select the proper instructions for delivery of apnea monitors.

Be able to select any special functional checking, delivery, assessment, pickup, exchange, and routine maintenance procedures that apply to apnea monitors.

Course ID: W1205

Course Title: Understanding Asthma

Course Time Estimate: 55 Minutes

This program has been approved for 1.1 hours Continuing Respiratory Care Education (CRCE) credit by the American Association for Respiratory Care.

Course Description: This course discusses asthma in detail including signs and symptoms, incidence and prevalence, diagnostic methods, and treatments. Ways to manage the condition are also discussed in this course.

Course Objectives:

- Be able to select the definition of asthma.
- Be able to select characteristics of an asthma attack.
- Be able to select causes of asthma.
- Be able to select the incidence and prevalence of asthma.
- Be able to select signs and symptoms of asthma.
- Be able to select methods used to diagnose asthma.
- Be able to select treatments for asthma.
- Be able to select ways to treat asthma in children.
- Be able to select asthma medications.
- Be able to select ways to manage asthma.

Course ID: W1210

Course Title: Understanding Emphysema

Course Time Estimate: 50 Minutes

This program has been approved for 1.0 hour Continuing Respiratory Care Education (CRCE) credit by the American Association for Respiratory Care.

Course Description: This course details the incidence and prevalence, signs and symptoms, diagnostic methods, causes, and treatments for emphysema. Risk factors and coping skills are also discussed in this course.

Course Objectives:

- Be able to select characteristics of emphysema.
- Be able to select causes of emphysema.
- Be able to select the incidence and prevalence of emphysema.
- Be able to select signs and symptoms of emphysema.
- Be able to select ways to diagnose emphysema.
- Be able to select treatments for emphysema.
- Be able to select ways to prevent emphysema.
- Be able to select risk factors of emphysema.
- Be able to select coping skills for dealing with emphysema.

Course ID: W1215

Course Title: Understanding COPD

Course Time Estimate: 60 Minutes

This program has been approved for 1.2 hours Continuing Respiratory Care Education (CRCE) credit by the American Association for Respiratory Care.

Course Description: This course details chronic obstructive pulmonary disease and its incidence and prevalence, causes, symptoms, diagnostic methods, and treatments.

Course Objectives:

- Be able to select the definition of COPD.
- Be able to select the incidence and prevalence of COPD.
- Be able to select characteristics of healthy lung function.
- Be able to select causes of COPD.
- Be able to select signs and symptoms of COPD.
- Be able to select diagnostic methods for COPD.
- Be able to select treatments for COPD.
- Be able to select complications of COPD.
- Be able to select ways to manage COPD.
- Be able to select current research for COPD.

Course ID: W1225

Course Title: Understanding Tuberculosis

Course Time Estimate: 60 Minutes

This program has been approved for 1.2 hours Continuing Respiratory Care Education (CRCE) credit by the American Association for Respiratory Care.

Course Description: This course details the incidence and prevalence, diagnosis, treatment, contributing factors, and prevention of tuberculosis. Current research is also addressed in the course.

Course Objectives:

Be able to select the incidence and prevalence of tuberculosis.

Be able to select the bacterium that causes tuberculosis.

Be able to select characteristics of latent tuberculosis.

Be able to select characteristics of active tuberculosis.

Be able to select symptoms of tuberculosis.

Be able to select TB skin testing procedures.

Be able to select ways to diagnose tuberculosis.

Be able to select treatments for tuberculosis.

Be able to select uses of the tuberculosis vaccine.

Be able to select ways to prevent the spread of tuberculosis.

Be able to select current research on tuberculosis.

Course ID: W1230

Course Title: Understanding Cystic Fibrosis

Course Time Estimate: 50 Minutes

This program has been approved for 1.0 hour Continuing Respiratory Care Education (CRCE) credit by the American Association for Respiratory Care.

Course Description: This course details the prevalence, signs and symptoms, diagnostic methods, causes, and treatments for cystic fibrosis.

Course Objectives:

Be able to select the names of the physicians that first described cystic fibrosis.

Be able to select the description and characteristics of cystic fibrosis disease.

Be able to select alternate names for cystic fibrosis.

Be able to select causes of cystic fibrosis.

Be able to select the incidence and prevalence of cystic fibrosis.

Be able to select the signs and symptoms of cystic fibrosis.

Be able to select methods used to diagnose cystic fibrosis.

Be able to select methods used to treat cystic fibrosis.

Course ID: W1235

Course Title: Understanding Bronchiectasis

Course Time Estimate: 50 Minutes

This program has been approved for 1.0 hour Continuing Respiratory Care Education (CRCE) credit by the American Association for Respiratory Care.

Course Description: This course details bronchiectasis and its causes, symptoms, diagnostic methods, and treatments.

Course Objectives:

- Be able to select the definition of bronchiectasis.
- Be able to select healthy lung function.
- Be able to select the incidence and prevalence of bronchiectasis.
- Be able to select causes of bronchiectasis.
- Be able to select sign and symptoms of bronchiectasis.
- Be able to select ways to diagnose bronchiectasis.
- Be able to select treatments for bronchiectasis.
- Be able to select ways to manage bronchiectasis.

Course ID: W1240

Course Title: Understanding Acute Respiratory Distress Syndrome

Course Time Estimate: 50 Minutes

This program has been approved for 1.0 hour Continuing Respiratory Care Education (CRCE) credit by the American Association for Respiratory Care.

Course Description: This course details the incidence and prevalence, causes, signs and symptoms, diagnosis, and treatments for ARDS.

Course Objectives:

- Be able to select the definition of ARDS.
- Be able to select how the lungs normally function.
- Be able to select the effects of ARDS.
- Be able to select causes of ARDS.
- Be able to select the incidence and prevalence of ARDS.
- Be able to select how ARDS is diagnosed.
- Be able to select treatments for ARDS.
- Be able to select the recovery process for ARDS.
- Be able to select complications of ARDS.
- Be able to select current research on ARDS.

Course ID: W1250

Course Title: Understanding Bronchopulmonary Dysplasia

Course Time Estimate: 50 Minutes

This program has been approved for 1.0 hour Continuing Respiratory Care Education (CRCE) credit by the American Association for Respiratory Care.

Course Description: This course details bronchopulmonary dysplasia and its incidence and prevalence, causes, diagnosis, risk factors, treatment and ways to manage the disease.

Course Objectives:

Be able to select the definition of BPD.

Be able to select the incidence and prevalence of BPD.

Be able to select causes of BPD.

Be able to select risk factors for BPD.

Be able to select complications of BPD.

Be able to select signs and symptoms of BPD.

Be able to select ways to diagnose BPD.

Be able to select treatments for BPD.

Be able to select ways to manage BPD.

Be able to select current research on BPD.

Course ID: W1260

Course Title: Understanding Pulmonary Arterial Hypertension

Course Time Estimate: 50 Minutes

This program has been approved for 1.0 hour Continuing Respiratory Care Education (CRCE) credit by the American Association for Respiratory Care.

Course Description: This course details PAH and its incidence and prevalence, causes, diagnostic methods, treatments and ways to manage the disease.

Course Objectives:

- Be able to select the definition of PAH.
- Be able to select incidence and prevalence of PAH.
- Be able to select types of PAH.
- Be able to select causes of PAH.
- Be able to select signs and symptoms of PAH.
- Be able to select ways to diagnose PAH.
- Be able to select treatments for PAH.
- Be able to select conditions that lead to SPAH.
- Be able to select complications of PAH.
- Be able to select ways to manage PAH.

Course ID: W1265

Course Title: Understanding Sarcoidosis

Course Time Estimate: 70 Minutes

This program has been approved for 1.4 hours Continuing Respiratory Care Education (CRCE) credit by the American Association for Respiratory Care.

Course Description: This course details sarcoidosis and its incidence and prevalence, causes, symptoms, diagnostic methods, and treatments.

Course Objectives:

- Be able to select the definition of sarcoidosis.
- Be able to select the incidence and prevalence of sarcoidosis.
- Be able to select the types of sarcoidosis.
- Be able to select the effects of sarcoidosis.
- Be able to select the causes of sarcoidosis.
- Be able to select symptoms of sarcoidosis.
- Be able to select ways to diagnose sarcoidosis.
- Be able to select treatment options for sarcoidosis.
- Be able to select research on sarcoidosis.
- Be able to select ways to live with sarcoidosis.

Course ID: W1270

Course Title: Understanding Pulmonary Embolism

Course Time Estimate: 50 Minutes

This program has been approved for 1.0 hour Continuing Respiratory Care Education (CRCE) credit by the American Association for Respiratory Care.

Course Description: This course details pulmonary embolism and its causes, including an in-depth look at DVT. In addition this course will discuss risk factors, treatments, and prevention for pulmonary embolism.

Course Objectives:

Be able to select the definitions for pulmonary embolism and deep vein thrombosis.

Be able to select incidence and prevalence for pulmonary embolism.

Be able to select risk factors for pulmonary embolism and deep vein thrombosis.

Be able to select signs and symptoms of pulmonary embolism.

Be able to select ways to diagnose pulmonary embolism.

Be able to select treatment for pulmonary embolism.

Be able to select ways to prevent pulmonary embolism.

Be able to select complications of pulmonary embolism.

Be able to select research on pulmonary embolism.

Course ID: W1275

Course Title: Understanding Sleep Apnea

Course Time Estimate: 60 Minutes

This program has been approved for 1.2 hours Continuing Respiratory Care Education (CRCE) credit by the American Association for Respiratory Care.

Course Description: This course details sleep apnea and its incidence and prevalence, causes, signs, diagnostic methods, and treatments.

Course Objectives:

- Be able to select the definition of sleep apnea.
- Be able to select the types of sleep apnea.
- Be able to select causes of sleep apnea.
- Be able to select the incidence and prevalence of sleep apnea.
- Be able to select risk factors for sleep apnea.
- Be able to select signs and symptoms of sleep apnea.
- Be able to select ways to diagnose sleep apnea.
- Be able to select treatments for sleep apnea.
- Be able to select ways to live with sleep apnea.
- Be able to select research being conducted on sleep apnea.

Course ID: W1300

Course Title: Understanding Lung Cancer

Course Time Estimate: 60 Minutes

This program has been approved for 1.2 hours Continuing Respiratory Care Education (CRCE) credit by the American Association for Respiratory Care.

Course Description: This course details the types, prevalence, risk factors, signs and symptoms, detection methods, staging, and treatments for lung cancer.

Course Objectives:

- Be able to select the prevalence of lung cancer.
- Be able to select the types and subtypes of lung cancer.
- Be able to select risk factors for lung cancer.
- Be able to select the signs and symptoms of lung cancer.
- Be able to select lung cancer detection methods.
- Be able to select ways lung cancer is staged.
- Be able to select treatment methods for lung cancer.

Course ID: W1400

Course Title: Understanding Guillain-Barre Syndrome

Course Time Estimate: 60 Minutes

This program has been approved for 1.2 hours Continuing Respiratory Care Education (CRCE) credit by the American Association for Respiratory Care.

Course Description: This course details the incidence and prevalence, phases, signs and symptoms, diagnostic methods, causes, and treatments for Guillain-Barré Syndrome.

Course Objectives:

Be able to select the incidence and prevalence of GBS.

Be able to select how GBS presents and common signs and symptoms.

Be able to select which part of the nervous system GBS affects.

Be able to select how GBS attacks neurons.

Be able to select the three phases of GBS.

Be able to select how GBS is diagnosed.

Be able to select how GBS is treated.

Be able to select common misconceptions about GBS.

Be able to select current research on GBS.

Course ID: W1410

Course Title: Understanding Myasthenia Gravis

Course Time Estimate: 50 Minutes

This program has been approved for 1.0 hour Continuing Respiratory Care Education (CRCE) credit by the American Association for Respiratory Care.

Course Description: This course details the incidence and prevalence, phases, signs and symptoms, diagnostic methods, causes, and treatments for Myasthenia Gravis.

Course Objectives:

Be able to select the incidence and prevalence of MG.

Be able to select how MG presents and common signs and symptoms.

Be able to select which part of the nervous system MG affects.

Be able to select how MG attacks the neuromuscular junction.

Be able to select how MG is diagnosed.

Be able to select how MG is treated.

Be able to select current research on MG.

Course ID: W1420

Course Title: Understanding Amyotrophic Lateral Sclerosis

Course Time Estimate: 50 Minutes

This program has been approved for 1.0 hour Continuing Respiratory Care Education (CRCE) credit by the American Association for Respiratory Care.

Course Description: This course details the prevalence, signs and symptoms, diagnostic methods, causes, and treatments for amyotrophic lateral sclerosis.

Course Objectives:

- Be able to select how ALS affects the nerve cells.
- Be able to select the characteristics of motor neuron diseases.
- Be able to select the incidence and prevalence of ALS.
- Be able to select the symptoms of ALS.
- Be able to select how ALS is diagnosed.
- Be able to select the causes of ALS.
- Be able to select the gene that has been linked to causing ALS.
- Be able to select treatments for ALS.
- Be able to select new research associated with ALS.
- Be able to select the meanings of incidence and prevalence.

Course ID: W1430

Course Title: Understanding Multiple Sclerosis

Course Time Estimate: 90 Minutes

This program has been approved for 1.0 hour Continuing Respiratory Care Education (CRCE) credit by the American Association for Respiratory Care.

Course Description: This course details the prevalence, signs and symptoms, diagnostic methods, causes, and treatments for multiple sclerosis.

Course Objectives:

- Be able to select the characteristics and types of MS.
- Be able to select the incidence and prevalence of MS.
- Be able to select the suspected causes of MS.
- Be able to select how the immune system works and is disrupted with MS.
- Be able to select the genetic links to MS.
- Be able to select MS diagnostic methods.
- Be able to select symptoms of MS.
- Be able to select MS treatment modalities and unproven treatments.

Course ID: W1450

Course Title: Understanding Dementia

Course Time Estimate: 120 Minutes

This program has been approved for 2.4 hours Continuing Respiratory Care Education (CRCE) credit by the American Association for Respiratory Care.

Course Description: This course details the prevalence, signs and symptoms, diagnostic methods, causes, and treatments for dementia.

Course Objectives:

- Be able to select the definition and types of dementia.
- Be able to select examples of the different types of dementia.
- Be able to select the most common form of dementia.
- Be able to select incidence and prevalence of dementia.
- Be able to select other conditions that can cause dementia or dementia-like symptoms.
- Be able to select conditions that do not cause dementia.
- Be able to select the risk factors associated with dementia.
- Be able to select the causes of dementia.
- Be able to select the methods for diagnosing dementia.
- Be able to select treatment modalities for dementia.
- Be able to select ways to care for people with dementia.

Course ID: W1460

Course Title: Understanding Cerebral Palsy

Course Time Estimate: 100 Minutes

This program has been approved for 2.0 hours Continuing Respiratory Care Education (CRCE) credit by the American Association for Respiratory Care.

Course Description: This course details the prevalence, signs and symptoms, diagnostic methods, causes, and treatments for cerebral palsy.

Course Objectives:

Be able to select when Cerebral Palsy was first described as a disorder.

Be able to select the characteristics and types of Cerebral Palsy.

Be able to select incidence and prevalence of Cerebral Palsy.

Be able to select disorders associated with Cerebral Palsy.

Be able to select causes for Cerebral Palsy.

Be able to select risk factors for Cerebral Palsy.

Be able to select ways to help prevent Cerebral Palsy.

Be able to select ways to diagnose Cerebral Palsy.

Be able to select treatment modalities for Cerebral Palsy.

Course ID: W1490

Course Title: Understanding Traumatic Brain Injury

Course Time Estimate: 80 Minutes

This program has been approved for 1.6 hours Continuing Respiratory Care Education (CRCE) credit by the American Association for Respiratory Care.

Course Description: This course details the incidence and prevalence, signs and symptoms, causes and risk factors, and diagnosis and treatments associated with traumatic brain injuries. Current research and prevention techniques are also discussed in this course.

Course Objectives:

- Be able to select the incidence and prevalence of TBI.
- Be able to select signs and symptoms of a TBI.
- Be able to select causes and risk factors for TBI.
- Be able to select different types of TBI.
- Be able to select treatment and rehabilitation for TBI.
- Be able to select components of the Glasgow coma scale.
- Be able to select the affects of TBI on consciousness.
- Be able to select complications and disabilities resulting from TBI.
- Be able to select ways to prevent TBI.
- Be able to select research on TBI.

Course ID: W1500

Course Title: Understanding Diabetes

Course Time Estimate: 70 Minutes

This program has been approved for 1.4 hours Continuing Respiratory Care Education (CRCE) credit by the American Association for Respiratory Care.

Course Description: This course details the prevalence, signs and symptoms, diagnostic methods, risk factors, and treatments for diabetes.

Course Objectives:

Be able to select the difference between diabetes and pre-diabetes.

Be able to select the different types of diabetes.

Be able to select the incidence and prevalence of diabetes.

Be able to select the signs and symptoms of diabetes.

Be able to select methods to diagnose diabetes.

Be able to select treatments for diabetes.

Be able to select risk factors for developing diabetes.

Be able to select ways to prevent diabetes.

Be able to select complications of diabetes.

Be able to select ways to manage diabetes.

Be able to select current research on diabetes.

Course ID: W1845

Course Title: Understanding Tetralogy Of Fallot

Course Time Estimate: 60Minutes

This program has been approved for 1.2 hours Continuing Respiratory Care Education (CRCE) credit by the American Association for Respiratory Care.

Course Description: This course details the prevalence, signs and symptoms, diagnostic methods, causes, and treatments for Tetralogy of Fallot.

Course Objectives:

Be able to select the names of the physicians that first described Tetralogy of Fallot.

Be able to select the description and characteristics of Tetralogy of Fallot.

Be able to select the normal blood flow through the heart and lungs.

Be able to select causes of Tetralogy of Fallot.

Be able to select the incidence and prevalence of Tetralogy of Fallot.

Be able to select the signs and symptoms of Tetralogy of Fallot.

Be able to select methods used to diagnose Tetralogy of Fallot.

Be able to select methods used to treat Tetralogy of Fallot.

Course ID: Y1025

Course Title: Respiratory Protection Guidance

Course Time Estimate: 75 Minutes

This program has been approved for 1.5 hours Continuing Respiratory Care Education (CRCE) credit by the American Association for Respiratory Care.

Course Description: This course provides guidance on OSHA's Respiratory Protection Standard so that clinical professionals can implement and maintain a compliant respiratory protection program.

Course Objectives:

- Be able to select OSHA's requirements for respiratory protection.
- Be able to select specific respirators required for health care agencies.
- Be able to select types of respiratory hazards that respirators help protect against.
- Be able to select the specifics of a respiratory protection program.
- Be able to select specifics for fit testing respirators.
- Be able to select proper respiratory storage and maintenance procedures.
- Be able to select required employee training for respiratory protection.
- Be able to select respiratory protection record retention requirements.

Course ID: Y1410

Course Title: How To Delegate

Course Time Estimate: 50 Minutes

This program has been approved for 1.0 hour Continuing Respiratory Care Education (CRCE) credit by the American Association for Respiratory Care.

Course Description: This course provides guidance and examples for delegating the appropriate tasks to subordinates, thus saving manager time for high priority tasks.

Course Objectives:

Be able to select the definition for delegation and its fundamentals.

Be able to select key information about the stages of delegation.

Be able to select the reasons for delegation and its purpose.

Be able to select ways to deal with and recognize barriers to effective delegation.

Be able to select the importance of good employee rapport.

Be able to select ways to improve your delegation.

Be able to select ways to minimize the risk involved inherently in delegation.

Be able to select the importance of support, evaluation and praising your delegates.

Be able to select why delegation should be used as a means of improving your and your staff's skills.

Course ID: Y1600

Course Title: Leadership Competencies

Course Time Estimate: 60 Minutes

This program has been approved for 1.2 hours Continuing Respiratory Care Education (CRCE) credit by the American Association for Respiratory Care.

Course Description: This course discusses the competencies an effectual leader must have in order to be considered a good leader.

Course Objectives:

Be able to select the differences between leaders and managers.

Be able to select key attributes good leaders must master.

Be able to select the different leadership styles that good leaders possess.

Be able to select ways of continually improving yourself and the company.

Be able to select the importance of exercising your authority in a consistent manner.
